INDEX OF SUBJECTS AND AUTHORS

Address of the President. Environments and reactions in tuberculosis, 633

Adult chest, healthy, The. Part I. X-ray findings. Studies on pulmonary tuberculosis, II, 429

Adults, tuberculosis among, The part played by contagion in, 55

——, —— in, communicability of, The, 1

——, tuberculous, Plasma calcium in, 270

Advances in the treatment of pulmonary tuberculosis, Recent, 279

Air, vitiated, Some relations of, and of inadequate feeding to experimental tuberculosis, 328

Alterations in the permeability of skin capillaries during the course of tuberculosis, 681

Anatomical structure of tubercle from histogenesis to cavity, The, 137

Animals, domestic, transmission of tuberculosis through, The, 419

——, tuberculous, elimination of specific substances of the tubercle bacillus in, The, 723

Annular shadows, Intrathoracic, 472

Antigen, Nonprotein, of the tubercle bacillus, A, 714

ARCHIBALD, EDWARD. Factors influencing the early mortality following extrapleural thoracoplasty, 564

Artificial pneumothorax following spontaneous pneumothorax of contralateral lung, 475

—— —— in pulmonary tuberculosis, Results of, 294

Aspiration tuberculosis in rabbits: an X-ray study of the development of the tuberculosis of primary infection and that of superinfection, 88

Atypical forms of the tubercle bacillus, Remarks on, 235

Avian, differentiating, from mammalian tubercle bacilli, A sensitization method of, 111

Bacilli, tubercle, graded conjunctival infections with, The reactions of guinea pigs to, 306

——, ——, mammalian, differentiating avian from, A sensitization method of, 111

——, ——, types of, The, in human tuberculosis, 225

Bacillus, tubercle, atypical forms of the, Remarks on, 235

——, ——, chemical analysis of the, The, 494

——, ——, nonprotein antigen of the, A, 714

——, ——, specific substances of the, elimination of, The, in tuberculous animals, 723

——, ——, The biology of the. I. Hydrogen-ion concentration produced by some members of the genus mycobacterium, 380

BAETJER, F. H., DUNHAM, KENNON, AND PANCOAST, HENRY K. Studies on pulmonary tuberculosis. II. The healthy adult chest. Part I. X-ray findings, 429

BAYLIS, ADELAIDE B. The Vernes test for tuberculosis, 500

BERNARD, LÉON. The onset of tuberculosis in man, 169

Biology of the tubercle bacillus, The. I. Hydrogen-ion concentration produced by some members of the genus mycobacterium, 380

Blood serum in tuberculosis, The refraction and colloid lability of the, 510

Broad phases of tuberculosis, A survey of some, 202

Bronchomycosis, etiological agent in, An, 373

Bronchopulmonary spirochetosis, 352

BROWN, LAWRASON. Exogenous reinfection in pulmonary tuberculosis, 40

Calcium, Plasma, in tuberculous adults, 270

Capillaries, skin, permeability of, Alterations in the, during the course of tuberculosis, 681

CARROLL, WILLIAM E., AND GIBSON, COLE B. Parenchymal pulmonary tuberculosis in children, 665
Case-finding, Tuberculosis, in children, 601
Cavity, anatomical structure of tubercle from histogenesis to, The, 137
Cells, giant, formation of, The, in tissue cultures, and their similarity to those in tuberculous lesions, 616
ČEPULIČ, VLADIMIR. Tuberculosis and housing, 221
CHADWICK, HENRY D. Tuberculosis case-finding in children, 601
Chemical analysis of the tubercle bacillus, The, 494
Chest, healthy adult, The. Part I. X-ray findings. Studies on pulmonary tuberculosis, II, 429
Children, case-finding in, Tuberculosis, 601
——, pulmonary tuberculosis in, Parenchymal, 665
Clinical pulmonary tuberculosis, early, diagnosis of, The most dependable symptoms for making a, 194
COGHILL, ROBERT D., AND JOHNSON, TREAT B. The chemical analysis of the tubercle bacillus, 494
Colloid lability of the blood serum in tuberculosis, The refraction and, 510
Communicability of tuberculosis in adults, The, 1
Conjunctival infections with tubercle bacilli, graded, The reactions of guinea pigs to, 306
Contagion in tuberculosis among adults, The part played by, 55
Contralateral lung, Artificial pneumothorax following spontaneous pneumothorax of, 475
Control of tuberculosis in Florence, The, 643
CORPER, H. J., AND LURIE, MAX B. The variability of localization of tuberculosis in the organs of different animals. IV. The cellular factor in the susceptibility of the various organs, 237
——, ——. ——., LURIE, MAX B., AND UYEI, NAO. The variability of the localization of tuberculosis in the organs of different animals. V. The significance of localization and development of the bacilli, and of the cellular reaction in man and animals, 389
——, ——. ——., ——, —— ——., —— ——, ——. The variability of the localization of tuberculosis in the organs of different animals. III. The importance of the growth of tubercle bacilli as determined by gaseous tension, 65
Cough droplets and dry dust in the spread of tuberculosis, The significance of, 609
CRAWFORD, A. B. A sensitization method of differentiating avian from mammalian tubercle bacilli, 111
Cultures, tissue, formation of giant cells in, The, and their similarity to those in tuberculous lesions, 616
CUMMINS, S. LYLE. The reactions of guinea pigs to graded conjunctival infections with tubercle bacilli, 306

DE DARANYI, JULIUS. The refraction and colloid lability of the blood serum in tuberculosis, 510
Dependable symptoms, The most, for making a diagnosis of early clinical pulmonary tuberculosis, 194
Diagnosis of early clinical pulmonary tuberculosis, The most dependable symptoms for making a, 194
—— —— pulmonary tuberculosis, Errors and difficulties in the, 188
Diets, varied, Experimental tuberculosis in rats on. III. Salt factors, 629
Differentiating avian from mammalian tubercle bacilli, A sensitization method of, 111
Difficulties in the diagnosis of pulmonary tuberculosis, Errors and, 188
Domestic animals, transmission of tuberculosis through, The, 419
Droplets, cough, and dry dust, The significance of, in the spread of tuberculosis, 609
Dry dust, The significance of cough droplets and, in the spread of tuberculosis, 609
DUNHAM, KENNON, PANCOAST, HENRY K., AND BAETJER, F. H. Studies on pulmonary tuberculosis. II. The healthy

adult chest. Part I. X-ray findings, 429
Dust, dry, The significance of cough droplets and, in the spread of tuberculosis, 609

Early clinical pulmonary tuberculosis, diagnosis of, The most dependable symptoms for making a, 194
—— mortality following extrapleural thoracoplasty, Factors influencing the, 564
EBERSON, FREDERICK, AND HOLMES, LILLIAN G. Studies in tuberculosis. VIII. The identification of a skin-reacting substance in tuberculous sera, 127
Elimination of specific substances of the tubercle bacillus in tuberculous animals, The, 723
Environments and reactions in tuberculosis. Address of the President, 633
Errors and difficulties in the diagnosis of pulmonary tuberculosis, 188
Etiological agent in bronchomycosis, An, 373
Exogenous reinfection in pulmonary tuberculosis, 40
Experimental tuberculosis in rats on varied diets. III. Salt factors, 629
—— ——, Some relations of vitiated air and of inadequate feeding to, 328
Extrapleural thoracoplasty, early mortality following, Factors influencing the, 564

Factors influencing the early mortality following extrapleural thoracoplasty, 564
Feeding, inadequate, Some relations of vitiated air and of, to experimental tuberculosis, 328
Florence, control of tuberculosis in, The, 643
Following extrapleural thoracoplasty, early mortality, Factors influencing the, 564
—— spontaneous pneumothorax of contralateral lung, Artificial pneumothorax, 475
Formation of giant cells in tissue cultures and their similarity to those in tuberculous lesions, The, 616
FURTH, J. The elimination of specific substances of the tubercle bacillus in tuberculous animals, 723

GAMMONS, HERBERT F. Artificial pneumothorax following spontaneous pneumothorax of contralateral lung, 475
Genus mycobacterium, Hydrogen-ion concentration produced by some members of the. The biology of the tubercle bacillus, I, 380
Giant cells, formation of, The, in tissue cultures, and their similarity to those in tuberculous lesions, 616
GIBSON, COLE B., AND CARROLL, WILLIAM E. Parenchymal pulmonary tuberculosis in children, 665
Graded conjunctival infections with tubercle bacilli, The reactions of guinea pigs to, 306
GREISHEIMER, E. M., AND VAN WINKLE, C. C. Plasma calcium in tuberculous adults, 270
Guinea pigs, The reactions of, to graded conjunctival infections with tubercle bacilli, 306

HASKINS, CHARLES H., SOPER, WILLARD B., AND SAMPSON, HOMER L. Aspiration tuberculosis in rabbits: an X-ray study of the development of the tuberculosis of primary infection and that of superinfection, 88
Healthy adult chest, The. Part I. X-ray findings. Studies on pulmonary tuberculosis, II, 429
Heliotherapy in surgical tuberculosis, social importance of, The, 521
Histogenesis to cavity, The anatomical structure of tubercle from, 137
Housing, Tuberculosis and, 221
Human tuberculosis, types of tubercle bacilli in, The 225
Hydrogen-ion concentration produced by some members of the genus mycobacterium. The biology of the tubercle bacillus, I, 380

Inadequate feeding, Some relations of vitiated air and of, to experimental tuberculosis, 328
Infection, primary, an X-ray study of the development of the tuberculosis of, and that of superinfection: Aspiration tuberculosis in rabbits, 88

Infections, graded conjunctival, with tubercle bacilli, The reactions of guinea pigs to, 306
Intestinal tuberculosis, Theses on, 588
Intrathoracic annular shadows, 472

JOHNSON, TREAT B., AND COGHILL, ROBERT D. The chemical analysis of the tubercle bacillus, 494

KNAPTON, FLORENCE, AND WEINZIRL, JOHN. The biology of the tubercle bacillus. I. Hydrogen-ion concentration produced by some members of the genus mycobacterium, 380
KRAUSE, ALLEN K. The anatomical structure of tubercle from histogenesis to cavity, 137

Lability, colloid, of the blood serum in tuberculosis, The refraction and, 510
LANGE, LINDA B. Experimental tuberculosis in rats on varied diets. III. Salt factors, 629
Laryngeal tuberculosis, treatment of, The, in sanatoria, 579
LEVINSON, SAMUEL A., AND PETERSEN, WILLIAM F. Alterations in the permeability of skin capillaries during the course of tuberculosis, 681
LEWIS, WARREN H. The formation of giant cells in tissue cultures and their similarity to those in tuberculous lesions, 616
Localization of tuberculosis in the organs of different animals, The variability of. III. The importance of the growth of tubercle bacilli as determined by gaseous tension, 65
—— —— —— —— —— —— —— ——, —— —— ——. IV. The cellular factor in the susceptibility of the various organs, 237
—— —— —— —— —— —— —— ——, —— —— ——. V. The significance of localization and development of the bacilli, and of the cellular reaction in man and animals, 389
Lung, contralateral, Artificial pneumothorax following spontaneous pneumothorax of, 475
Lung, motor, sensory and trophic reflexes from the, The, 477
LURIE, MAX B., AND CORPER, H. J. The variability of localization of tuberculosis in the organs of different animals. IV. The cellular factor in the susceptibility of the various organs, 237
——, —— ——., UYEI, NAO, AND CORPER, H. J. The variability of localization of tuberculosis in the organs of different animals. III. The importance of the growth of tubercle bacilli as determined by gaseous tension, 65
——, —— ——., ——, ——, —— ——, ——. ——. The variability of the localization of tuberculosis in the organs of different animals. V. The significance of localization and development of the bacilli, and of the cellular reaction in man and animals, 389

MAHER, STEPHEN J. The part played by contagion in tuberculosis among adults, 55
Making a diagnosis of early clinical pulmonary tuberculosis, The most dependable symptoms for, 194
Mammalian tubercle bacilli, differentiating avian from, A sensitization method of, 111
Man, onset of tuberculosis in, The, 169
Measure, serological, of tuberculosis, The, 505
Method, sensitization, of differentiating avian from mammalian tubercle bacilli, A, 111
Milk, The relation of, to tuberculosis, 399
Mortality following extrapleural thoracoplasty, early, Factors influencing the, 564
Most dependable symptoms for making a diagnosis of early clinical pulmonary tuberculosis, The, 194
Motor, sensory and trophic reflexes from the lung, The, 477
VON MÜLLER, FRIEDRICH. Errors and difficulties in the diagnosis of pulmonary tuberculosis, 188
MURRAY, R. S. E. Intrathoracic annular shadows, 472

Mycobacterium, Hydrogen-ion concentration produced by some members of the genus. The biology of the tubercle bacillus, I, 380

NEUFELD, F. The significance of cough droplets and dry dust in the spread of tuberculosis, 609

Nonprotein antigen of the tubercle bacillus, A, 714

Onset of tuberculosis in man, The, 169

Organs of different animals, localization of tuberculosis in the, The variability of. III. The importance of the growth of tubercle bacilli as determined by gaseous tension, 65

—— —— —— ——, —— —— —— —— ——, —— —— ——. IV. The cellular factor in the susceptibility of the various organs, 237

—— —— —— ——, —— —— —— —— ——, —— —— ——. V. The significance of localization and development of the bacilli, and of the cellular reaction in man and animals, 389

PANCOAST, HENRY K., BAETJER, F. H., AND DUNHAM, KENNON. Studies on pulmonary tuberculosis. II. The healthy adult chest. Part I. X-ray findings, 429

Parenchymal pulmonary tuberculosis in children, 665

PARFITT, CHARLES D. The treatment of laryngeal tuberculosis in sanatoria, 579

PARK, WILLIAM H. A survey of some broad phases of tuberculosis, 202

——, —— ——. The relation of milk to tuberculosis, 399

Part played by contagion in tuberculosis among adults, The, 55

Permeability of skin capillaries, Alterations in the, during the course of tuberculosis, 681

PETERSEN, WILLIAM F., AND LEVINSON, SAMUEL A. Alterations in the permeability of skin capillaries during the course of tuberculosis, 681

PINNER, MAX. A nonprotein antigen of the tubercle bacillus, 714

Plasma calcium in tuberculous adults, 270

Pneumothorax, Artificial, following spontaneous pneumothorax of contralateral lung, 475

——, ——, in pulmonary tuberculosis, Results of, 294

——, spontaneous, of contralateral lung, Artificial pneumothorax following, 475

POTTENGER, F. M. The most dependable symptoms for making a diagnosis of early clinical pulmonary tuberculosis, 194

——, ——. ——. The motor, sensory and trophic reflexes from the lung, 477

President, Address of the. Environments and reactions in tuberculosis, 633

PRIBRAM, ERNST. Remarks on atypical forms of the tubercle bacillus, 235

Primary infection, an X-ray study of the development of the tuberculosis of, and that of superinfection: Aspiration tuberculosis in rabbits, 88

Pulmonary tuberculosis, artificial pneumothorax in, Results of, 294

—— ——, diagnosis of, Errors and difficulties in the, 188

—— ——, early clinical, diagnosis of, The most dependable symptoms for making a, 194

—— —— in children, Parenchymal, 665

—— ——, reinfection in, Exogenous, 40

—— ——, Studies on. II. The healthy adult chest. Part I. X-ray findings, 429

—— ——, treatment of, Recent advances in the, 279

—— ——, —— ——, surgical, The, 544

Rabbits, tuberculosis in, Aspiration: an X-ray study of the development of the tuberculosis of primary infection and that of superinfection, 88

RABINOWITSCH-KEMPNER, LYDIA. The transmission of tuberculosis through domestic animals, 419

——, ——. The types of tubercle bacilli in human tuberculosis, 225

Rats on varied diets, Experimental tuberculosis in. III. Salt factors, 629

Reactions, Environments and, in tuberculosis. Address of the President, 633

Reactions of guinea pigs to graded conjunctival infections with tubercle bacilli, The, 306
Recent advances in the treatment of pulmonary tuberculosis, 279
Reflexes from the lung, The motor, sensory and trophic, 477
Refraction and colloid lability of the blood serum in tuberculosis, The, 510
Reinfection in pulmonary tuberculosis, Exogenous, 40
Relation of milk to tuberculosis, The, 399
Relations of vitiated air and of inadequate feeding to experimental tuberculosis, Some, 328
Remarks on atypical forms of the tubercle bacillus, 235
Results of artificial pneumothorax in pulmonary tuberculosis, 294
RIST, EDOUARD. Recent advances in the treatment of pulmonary tuberculosis, 279
——, ——. Results of artificial pneumothorax in pulmonary tuberculosis, 294
ROATTA, G. B. The control of tuberculosis in Florence, 643
ROLLIER, A. The social importance of heliotherapy in surgical tuberculosis, 521
RONZONI, GAETANO. The communicability of tuberculosis in adults, 1

SAMPSON, HOMER L., HASKINS, CHARLES H., AND SOPER, WILLARD B. Aspiration tuberculosis in rabbits: an X-ray study of the development of the tuberculosis of primary infection and that of superinfection, 88
Sanatoria, treatment of laryngeal tuberculosis in, The, 579
SAYAGO, GUMERSINDO. The surgical treatment of pulmonary tuberculosis, 544
Sensitization method of differentiating avian from mammalian tubercle bacilli, A, 111
Sensory and trophic reflexes from the lung, The motor, 477
Sera, tuberculous, skin-reacting substance in, The identification of a. Studies in tuberculosis, VIII, 127
Serological measure of tuberculosis, The, 505
Serum, blood, in tuberculosis, The refraction and colloid lability of the, 510
SEWALL, HENRY. Address of the President. Environments and reactions in tuberculosis, 633
——, —— (with M. B. LURIE, ISIDORE STOIFER, ROSE SILVER AND C. T. WOO). Some relations of vitiated air and of inadequate feeding to experimental tuberculosis, 328
Shadows, annular, Intrathoracic, 472
Significance of cough droplets and dry dust in the spread of tuberculosis, The, 609
Skin capillaries, permeability of, Alterations in the, during the course of tuberculosis, 681
Skin-reacting substance in tuberculous sera, The identification of a. Studies in tuberculosis, VIII, 127
SMITH, DAVID T. Bronchopulmonary spirochetosis, 352
Social importance of heliotherapy in surgical tuberculosis, The, 521
Some broad phases of tuberculosis, A survey of, 202
—— relations of vitiated air and of inadequate feeding to experimental tuberculosis, 328
SOPER, WILLARD B., SAMPSON, HOMER L., AND HASKINS, CHARLES H. Aspiration tuberculosis in rabbits: an X-ray study of the development of the tuberculosis of primary infection and that of superinfection, 88
Specific substances of the tubercle bacillus, elimination of, The, in tuberculous animals, 723
Spirochetosis, Bronchopulmonary, 352
Spontaneous pneumothorax of contralateral lung, Artificial pneumothorax following, 475
Spread of tuberculosis, The significance of cough droplets and dry dust in the, 609
STEWART, DAVID A. Theses on intestinal tuberculosis, 588
Structure, anatomical, of tubercle from histogenesis to cavity, The, 137
Studies in tuberculosis, VIII. The identification of a skin-reacting substance in tuberculous sera, 127

Studies on pulmonary tuberculosis. II. The healthy adult chest. Part I. X-ray findings, 429
Superinfection, an X-ray study of the development of the tuberculosis of primary infection and that of: Aspiration tuberculosis in rabbits, 88
Surgical treatment of pulmonary tuberculosis, The, 544
—— tuberculosis, heliotherapy in, social importance of, The, 521
Survey of some broad phases of tuberculosis, A, 202
Symptoms, The most dependable, for making a diagnosis of early clinical pulmonary tuberculosis, 194

TANNER, F. W., AND WALLACE, G. I. An etiological agent in bronchomycosis, 373
Test, Vernes, for tuberculosis, The, 500
Theses on intestinal tuberculosis, 588
Thoracoplasty, extrapleural, early mortality following, Factors influencing the, 564
Tissue cultures, formation of giant cells in, The, and their similarity to those in tuberculous lesions, 616
Transmission of tuberculosis through domestic animals, The, 419
Treatment of laryngeal tuberculosis in sanatoria, The, 579
—— —— pulmonary tuberculosis, Recent advances in the, 279
—— —— —— ——, surgical, The, 544
——, surgical, of pulmonary tuberculosis, The, 544
Trophic reflexes from the lung, The motor, sensory and, 477
Tubercle, anatomical structure of, from histogenesis to cavity, The, 137
—— bacilli, graded conjunctival infections with, The reactions of guinea pigs to, 306
—— ——, mammalian, differentiating avian from, A sensitization method of, 111
—— ——, types of, The, in human tuberculosis, 225
—— bacillus, atypical forms of the, Remarks on, 235
—— ——, chemical analysis of the, The, 494
—— ——, nonprotein antigen of the, A, 714
Tubercle bacillus, specific substances of the, elimination of, The, in tuberculous animals, 723
—— ——, The biology of the. I. Hydrogen-ion concentration produced by some members of the genus mycobacterium, 380
Tuberculosis, A survey of some broad phases of, 202
——, Alterations in the permeability of skin capillaries during the course of, 681
—— among adults, contagion in, The part played by, 55
—— and housing, 221
—— case-finding in children, 601
——, communicability of, The, in adults, 1
——, control of, in Florence, The, 643
——, Environments and reactions in. Address of the President, 633
——, Experimental, in rats on varied diets. III. Salt factors, 629
——, ——, Some relations of vitiated air and of inadequate feeding to, 328
——, human, types of tubercle bacilli in, The, 225
—— in man, The onset of, 169
—— —— rabbits, Aspiration: an X-ray study of the development of the tuberculosis of primary infection and that of superinfection, 88
——, intestinal, Theses on, 588
——, laryngeal, treatment of, The, in sanatoria, 579
——, localization of, in the organs of different animals, The variability of. III. The importance of the growth of tubercle bacilli as determined by gaseous tension, 65
——, —— ——, —— —— —— —— ——
——, —— —— ——. IV. The cellular factor in the susceptibility of the various organs, 237
——, —— ——, —— —— —— —— ——
——, —— —— ——. V. The significance of localization and development of the bacilli, and of the cellular reaction in man and animals, 389
—— of primary infection and that of superinfection, an X-ray study of the de-

velopment of the: Aspiration tuberculosis in rabbits, 88
——, pulmonary, artificial pneumothorax in, Results of, 294
——, ——, diagnosis of, Errors and difficulties in the, 188
——, ——, early clinical, diagnosis of, The most dependable early symptoms for making a, 194
——, ——, in children, Parenchymal, 665
——, ——, reinfection in, Exogenous, 40
——, ——, Studies on. II. The healthy adult chest. Part I. X-ray findings, 429
——, ——, treatment of, Recent advances in the, 279
——, ——, —— ——, surgical, The, 544
——, relation of milk to, The, 399
——, serological measure of, The, 505
——, spread of, The significance of cough droplets and dry dust in the, 609
——, Studies in. VIII. The identification of a skin-reacting substance in tuberculous sera, 127
——, surgical, heliotherapy in, social importance of, The, 521
——, The refraction and colloid lability of the blood serum in, 510
——, transmission of, The, through domestic animals, 419
——, Vernes test for, The, 500
Tuberculous adults, Plasma calcium in, 270
—— animals, elimination of specific substances of the tubercle bacillus in, The, 723
—— lesions, formation of giant cells in tissue cultures and their similarity to those in, The, 166
—— sera, skin-reacting substance in, The identification of a. Studies in tuberculosis, VIII, 127
Types of tubercle bacilli in human tuberculosis, The, 225

UYEI, NAO, CORPER, H. J., AND LURIE, MAX B. The variability of localization of tuberculosis in the organs of different animals. III. The importance of the growth of tubercle bacilli as determined by gaseous tension, 65
——, ——, ——, ——. ——., —— ——, —— ——. The variability of the localization of tuberculosis in the organs of different animals. V. The significance of localization and development of the bacilli, and of the cellular reaction in man and animals, 389

VAN WINKLE, C. C., AND GREISHEIMER, E. M. Plasma calcium in tuberculous adults, 270
Variability of localization of tuberculosis in the organs of different animals, The. III. The importance of the growth of tubercle bacilli as determined by gaseous tension, 65
—— —— —— —— —— —— —— —— —— —— ——, ——. IV. The cellular factor in the susceptibility of the various organs, 237
—— —— —— —— —— —— —— —— —— —— ——, ——. V. The significance of localization and development of the bacilli, and of the cellular reaction in man and animals, 389
Varied diets, Experimental tuberculosis in rats on. III. Salt factors, 629
VERNES, ARTHUR. The serological measure of tuberculosis, 505
Vernes test for tuberculosis, The, 500
Vitiated air, Some relations of, and of inadequate feeding to experimental tuberculosis, 328

WALLACE, G. I., AND TANNER, F. W. An etiological agent in bronchomycosis, 373
WEINZIRL, JOHN, AND KNAPTON, FLORENCE. The biology of the tubercle bacillus. I. Hydrogen-ion concentration produced by some members of the genus mycobacterium, 380

X-ray study of the development of the tuberculosis of primary infection and that of superinfection, an: Aspiration tuberculosis in rabbits, 88
